How to repair whirlpool ultimate care ii washer

Appliance center information. Free repair help and troubleshooting. Troubleshooting Guide Whirlpool® washing machines (direct drive) Problem Possible Cause Rimedy Washer will not work. No electricity. Check the electricity. Power cable. Check the power cord. Open circuit in timer. Check the timer. Corto (base wire contact metal). Check all wires for bare wire or terminal touch metal. Water will not enter the washing machine. No electricity. Check the electricity. Power cable. Check the power cord. Water taps closed. Make sure the water taps are turned "ON". The inlet tubes have bowed. Move intake tubes to avoid bending. Connected input pipe diagrams. Remove the screens from the suction tubes and clean. Water valve. Check the water valve. Note: Don't tamper with the screens. Water level switch. Check the water level switch. Water temperature switch. Check the water temperature switch. Timer, check the timer. Exhaust clamp. Check terminal connections on parts above. Broken wire in harness wiring. Check the broken wire. Water level too low. Water level switch. Check the water level switch. Drive engine will not run. No electricity. Check the electricity. Power cable. Check the power cord. Heated drive motor. Let the engine overload cool. Starter switch drive motor. Check the start switch. Engine. Engine control. Water level switch. Check the water level switch. Pump. Check the timer. Lid open in "SPIN CYCLE". There's a lid nearby. Lid opened in the last 2 minutes of agitation. There's a lid nearby. Dropped terminal connections on parts above. Broken wire in the wiring. Check the broken wire. Change. Replace the change. The washing machine doesn't shake. Water level switch. Check the water level switch. Starter switch drive motor. Check the start switch. Engine. Engine control. Timer, check the timer. Change. Replace the change. Exhaust clamp. Check terminal connections on parts above. Broken wire in harness wiring. Check the broken wire. Toc, during agitation. Suspension attacking. Clean suspension plate and tablets with liquid detergent. Spoline activator. Check the agitator. Try to shake during rotation. Broken motor attack. Check engine coupling. Change. Replace the change. Don't shake or spin, but drive the engine runs. Broken motor attack. Check engine coupling. The water is not empty by the washing machine. The drainage pipe has been attached. Move the exhaust pipe to avoid bending or replacing. Too sweaty. Add cold water. Use less detergent. Uncorrect discharge height. Read your "Installation Instructions". Connected exhaust pipe. Remove obstruction. Pump. Check the timer. Lid switch. Check the switch. Exhaust clamp. Check terminal connections on parts above. Broken wire in harness wiring. Check the broken wire. The basket is slow or does not turn. Open lid. There's a lid nearby. Water level switch. Check the water level switch. Lid switch. Check the switch. Starter switch drive motor. Check the start switch. Engine. Engine control. Timer, check the timer. Soft clutch spring. Replace the clutch spring. Clothing betweenand tub. Take off your clothes. Change. Replace the change. Exhaust clamp. Check terminal connections on parts above. Broken wire in harness wiring. Check the broken wire. The washing machine loses water or splashes water on the floor. Pipes are not protected. Make sure the clamps of the pipe are tight, both inside and outside the washing machine. Pipe leaks. Check the pipes and replace. Pump. Use of low water level with high agitation. Use the highest water level. Washer won't spray the rinse. Water valve. Check the water valve. Water temperature switch. Check the water temperature switch. Timer, check the timer. Exhaust clamp. Check terminal connections on parts above. Broken wire in harness wiring. Check the broken wire. Washer doesn't turn off. Timer, check the timer. Washer shakes or moves around. Shipping material not removed. Remove the shipping material. Unbalanced load. Move your clothes evenly around the basket. Washer not leveled. Adjust the front feet and feet of leveling of the ear. Weak floors. The floor must be solid. There's no ballast. Replace the basket. Suspension plate. Check suspension. Suspensions. Check suspension. Support of the tub. Check the tub support. Suspension springs. Check the suspension springs. Water doesn't turn out. Water valve. Listen to the running water. If you feel the current water, the valve is blocked and must be replaced. Water level switch. Check the water level switch. Switching pipe at water level or air loss. Check the pipe. The air escape in the air dome. Check the air dome. Timer, check the timer. No hot water. Water valve. Water valvecoil). Water temperature switch. Check the water temperature switch. Timer, check the timer. Exhaust clamp. Check terminal connections on parts above. Broken wire in harness wiring. Check the broken wire. The washing machine damages clothes. Too much bleach or fabric softener poured on clothes. Read your laundry guide. Too many clothes. Read your laundry guide. Agitator. Check the agitator. Basket. Check the basket. Water level too low. Increase the water level. Foreign objects. Take off. Timer doesn't move. Motor timer. Check the timer engine. Timer. Check the timer. Water level switch. Check the water level switch. Dropped. Check terminal connections on parts above. Broken wire in harness wiring. Check the broken wire. The washing machine loses oil. Change. Replace the change. The basket won't stop in seven seconds. Rollers, cams, or lining. Replace. Exquisite brake. Linings. Replace. - Troubleshooting Guide - How the sinks work - Washer cabinet removal (Take your washer apart) - Timer knob replacement - Testing/Replacing water level switch - Testing/Replacing water entry valve - Water input pipe replacement - Reparation of agitator problems - Remotorengine coupling - Test/Replacing drive motor If your problem is not listed, try this site. how to take apart a whirlpool ultimate care ii washer. how to use whirlpool ultimate care ii washer
